Burger Gets SAFER

BURGER BOAT COMPANY HAS FORMED AN ALLIANCE with SAFE (Strategically Armored and Fortified Environments), one of the world's foremost authorities on effective high-end residential and superyacht security. President David Ross said, "Given the times in which we live, the need for world-class security is evident. The challenge was to provide the highest level of security in a manner that would be transparent to our owners and their guests." SAFE security solutions will be available to all of Burger's future projects and an advanced design has already been incorporated into one of Burger's latest projects. www.burgerboat.com; www.SAFEenvironments.com

BROWNIE'S COMPRESSORS BECOME STANDARD ON CHRISTENSEN YACHTS

Brownie's Third Lung adds Christensen Yachts as an Original Equipment Manufacturer (OEM) customer following an agreement to include Brownie's YachtPro™ Compressors as standard equipment on every new yacht starting with Hull #33, a Custom 157.

Christensen Yachts is the newest member of the boat manufacturing community to take advantage of Brownie's OEM associate program. Participants in this program feature Brownie's diving products on their equipment options list. Other OEM associates include yacht-builders Westport and Rayburn and RIB-builder Nautica International.

Brownie's offers a full line of compressor systems and diving products designed specifically for use in the marine environment that can be easily installed aboard boats of various sizes. The compressors feature a stainless steel base and hardware for superior corrosion resistance in a footprint that is almost 30 percent smaller than other available models, preserving valuable space while still providing state-of-the-art, high-quality tank filling systems. www.browniedive.com

LLOYD'S APPROVAL FOR CENTEK EXHAUST SYSTEMS

Centek Industries' primary muffler products, tubing and the Gen-Kleen system have received the LR Type Approval Certificate after being approved by Lloyd's Register. Centek also holds American Bureau of Shipping Type Certification, UL Approval and wet marine exhaust systems exceed ABYC guidelines P-1. Centek is the only company to achieve all these distinctions. Gen-Kleen processes diesel generator exhaust discharge clean water overboard. It eliminates sheen around boats and makes access to cabins, ports and pristine water environments safe-free for boats using this system.

Centek manufactures a wide variety of engine and generator exhaust systems for boats ranging from five to 2,500 horsepower. More than half

of the exhaust applications require customized designs. The durable mufflers and tubing use fiberglass-reinforced composites that prevent corrosion. All Centek products feature the flame-retardant Vipel K190 resin, capable of resisting temperatures up to 350°F. www.centekindustries.com

ENSIGN. THE STANDARD FOR LARGE YACHTS.

LARGE YACHT SERVICES OF THE MARITIME AND COASTGUARD AGENCY

Ensign will: Survey any vessel for which the Code is relevant and issue a certificate of compliance on satisfactory completion of survey. Provide a service to owners, builders and designers for the examination of and comment upon any vessel projects for compliance with the Code.

Ensign offers: A dedicated team of surveyors and support staff widely experienced in the application of The MCA Large Yacht Code. A customer friendly, efficient service to all sectors of the large yacht industry. Unrivalled experience in application and interpretation of the Code. A service to owners, builders and designers, regardless of where the vessel is registered. Because MCA introduced the Code it can interpret it safely and accurately.

Meet us at the Fort Lauderdale International Boat Show in the UK Pavilion, Bahia Mar Centre where we will be happy to advise on all aspects of the MCA Code of Practice for Large Yachts. For more information contact Fiona Warren +44 (0) 7764 624 505.
