The future of diving is here.

- Built-in Hookah Diving System
- Up to 4 divers, down to 60 ft
 - Perfect for boats of almost any size

- Make Nitrox onboard
- The gas of choice for sport diving

NitroxMaker™

- Marinized tankfill compressors
- Dive system design, integration and installation

Dive Resource Center

Brownie's Third Lung

*Products on display at the Fort Lauderdale International Boat Show
Bahia Mar location, Booth #559 and #560*

After 25 years designing and manufacturing state-of-the-art diving solutions, Brownie's Third Lung remains dedicated to its mission of turning ideas into reality. Brownie's myriad of products, from Floating and Built-in Hookah Diving systems to complete dive locker design, air and mixed-gas filling stations and full submarine and hyperbaric chamber support, make diving easy, convenient and fun. Brownie's Built-in Hookah Diving System is a perfect example of a unique product that offers the freedom to dive anytime, for any reason, and from almost any vessel. In the year since its introduction, many boat manufacturers have started including the Built-in Hookah Diving System and E-Reel™ package as a standard feature or as an option. This system incorporates up to 150 feet of air hose and a compressor into a package that is small enough to fit virtually any boat or tender. The air hose is easily deployed for divers and automatically recoiled and stored in an out-of-the-way location at the end of the day. Another Brownie's innovation is the easy-to-use NitroxMaker™ system. In recent years, Nitrox has become the gas of choice for experienced and novice divers alike. Nitrox affords such benefits as extended time underwater and a reduced risk of decompression-related injuries. Brownie's designed the NitroxMaker™ in response to the need for an easy-to-use Nitrox station for yachts. This system is capable of producing and analyzing Nitrox mixtures from 21%–40% with just the turn of a dial. Simply choose the appropriate mixture and the NitroxMaker™ produces the gas using a membrane system. This method of Nitrox production eliminates the need to carry bulky and potentially hazardous cylinders of pure oxygen onboard. For vessels where space is limited, the NitroxMaker™ can now be integrated with the more compact YachtPro™ 45 compressor, in addition to the rest of the larger YachtPro™ line. This makes Nitrox generation available to a wide range of vessel sizes and configurations. Brownie's Third Lung has always specialized in designing, building and installing diving solutions that are specially tailored based on needs and integrated into the overall vessel plans from conception. Brownie's uses 2D and 3D modeling to design complete systems that will meet all of the diving needs of the passengers and crew, as well as the exacting space and power requirements of the vessel. Whether your diving needs require a basic tankfill system, built-in hookah or a full dive locker, Brownie's can design and build a diving solution that will be functional, versatile and attractive. Brownie's modular approach to outfitting major diving compressors and equipment storage facilities provides the freedom to custom design systems that fit, function and look as unique as every other aspect of the boat. To ensure customer satisfaction, Brownie's gauges the customer's needs and the builder's requirements from the very early stages of a project. For more information, please contact Brownie's at (800) 327-0412 or info@tankfill.com. For a complete list of products and a downloadable catalog, please visit www.tankfill.com and www.brownie-dive.com.

The Dockominium Group

The Dockominium Group, a licensed real estate broker, specializes in the

sale and purchase of fee simple and equitized membership yacht slips. Our inventory of deep water ocean access wet slips, capable of accommodating vessels from 50 to 115 feet, are primarily located in Southeast Florida. The group is featuring a desirable 60 by 21 foot slip, offered at \$700,000, in the protected basin of the JIB Yacht Club and Marina on exclusive Jupiter Island, Florida. One of only ten dockominiums in the sole public marina on the island, the slip offers bridge-free ocean access, just north of the inlet on the east side of the Intracoastal. The full service, well maintained marina's amenities include fuel, a pool, restrooms, laundry facilities, wireless Internet, cable, pump-out, a ships' store, and beach access. Contact the Dockominium Group at 772 465 0025 or visit our Web site, www.thedockominiumgroup.com, for more information.

The New Sabre 34 Express from Sabre Yachts of Maine

Following the success of the Sabre 38 and 42 Hard Top Express Models, Sabre yachts is proud to present the new Sabre 34 Hard Top Express. Built in Maine, home to America's finest yacht builders, this new design also offers the classic look and performance for which Sabre Yachts is so well known. We will be premiering this fine yacht at the Annapolis Power Boat Show from Oct. 12th to Oct. 15th 2006. For more information you can contact either of our offices; Oxford Boatyard Yacht Sales (410)226-0100 or Sabreline of Annapolis (410)267-1808 or visit our web sites at www.obys.com or www.sabrelineyachts.com. See you at the Annapolis Boat Show!
