

What's New?

BROWNIES THIRD LUNG Recreational Hookah System

Explorer 280 Series

- Supports 2 divers to 70-80 feet!
- Supports 3 divers to 45 feet!
- Run Time: over 3 continuous hours!

Explorer 390 Series

- Supports 3 divers to 80-90 feet!
- Supports 4 divers to 60 feet!
- Run time: over 4 continuous hours!

EX series is designed for extraordinary power, durability and efficiency. The Chain Driven Overhead Cam's (OHC) more advanced design reduces the number of parts and is much more efficient than the push rod design of other manufacturers. Its superior muffler design allows you to enjoy your dive without disturbing others. This machine has a 4-cycle OHV gasoline engine and a single head direct drive compressor. Weighting only 48-58 pounds, this is a convenient tool to navigate new waters. "Diver Adjustable" Air Flow and 10 foot heat transfer hose (in-line filter) with Quick Release fittings are the newest features to make your head spin. The ultraviolet stabilized Ballistic Nylon cover, Dive flag and Easy inflation/deflation design are the unique elements that make this product a phenomenal find.

MARES CYRANO SPEARGUN

- **TOTAL LENGTH: 28", 34", 39" or 44"!**
- **Technopolymer shock-absorber bushing and piston!**
- **Shock Line, Recharging Pump and Shaft Loader!**

This work of art is designed for heavy penetration. Fish big and small will surrender before its power. When you are holding one of these guns in your hands, the hunter's instinct awakens. Made from black anodized aluminum it's fast and highly accurate when firing. This is truly A World class pneumatic speargun, used by several members of the EXPLORADORES team. A Harmonic Stainless Spring Steel Shaft (7MM Thick/7MM Male thread) and a Hydrodynamic Line Retainer with Retaining Line, provide additional confidence when faced with difficult prey. This speargun has proven itself worthy in various expeditions around South Florida, where its owners returned home with a bag full of fish, a tan and a smile.
